PROJECTS

- **Online CV Maker**

  may 2025
  GitHub Link

  - Built a full-stack Online CV Maker using React.js, Node.js and Express.js
  - Designed an intuitive and responsive UI using Tailwind CSS, with polished components from react-icon
  - Implemented dynamic form sections for education, experience, and skills with real-time preview and download functionality.
  - Used MongoDB for efficient storage of user-generated resumes and profile data.
  - Integrated predefined resume templates and customizable color palettes, enabling users to see real-time visual changes as they personalize their CVs.

- **Video Calling Chat App**

  july 2025
  GitHub Link

  - Implemented real-time video calling using stream api for seamless peer-to-peer connections.
  - Built instant chat messaging alongside video calls with socket.io for low-latency communication.
  - Integrated JWT-based authentication, onboarding flow and friend-request system for secure user management.
  - Designed a responsive UI in React + Tailwind CSS, with multi-color theme support with daisy UI and notification badges.
  - Structured backend in Node.js + Express.js, MongoDB with Mongoose for persisting users, chats and friend-requests.
